# INFRARED FILTER & ADAPTER RING

## INFRARED FILTER

### General Information

The spectral range above 780nm is not visible to the human eye. Nevertheless, there is a guideline for special, infrared sensitive film. The sensitization of black and white infrared film goes to approximately 900nm. Some infrared images are possible that consist of a combination of visible and infrared light. For purely infrared images, radiation below approximately 780nm must be completely filtered out.

### Specification

Model	SPY-IR37JPU	SPY-IR58JPU
Dimension	37mm	58mm
Color	black	black
Weight	10g	22g
Material	Aluminum and 850glass	Aluminum and 850glass

### Application
